Dawn operates various tanks, hoppers, vats, pumps, mixers, and refrigeration equipment to produce food products for sale to commercial bakeries. All finished products produced at the Fox Avenue plant are food grade.

Dawn cleans equipment and surfaces with pressurized water as part of the food products manufacturing operations, including equipment and areas outside the building. Outside drains are closed using drain mats before cleaning the equipment and surfaces outside. Wastewater generated from cleaning outside is pumped into a 55-gallon drum for disposal offsite. Wastewater generated from cleaning inside passes through a grease trap before discharging to the sanitary sewer system.

Dawn receives and stores in bulk food-grade vegetable oil and salad oil for processing and stove oil for combustion in the facility boiler. The oil and stove oil are stored in a secondary containment area, which includes: a vertical aboveground storage tank (AST) containing salad oil, two vertical ASTs containing vegetable oil, and one horizontal AST containing stove oil. Dawn operates a boiler with the stove oil in order to periodically heat the vegetable oil during pumping operations.

Dawn provides the following documents in response to this request:

1) Warehouse Flow Chart and Production Flow Chart.

- e) *Provide all documents pertaining to sale, transfer, delivery, disposal, of any hazardous substances, scrap materials, and/or recyclable materials to this property.*

OBJECTION. This request is overbroad and unduly burdensome. Notwithstanding the foregoing objection, Dawn provides the following documents in response to this request:

- 1) See supporting documents listed in response to 1.g. above.
- 2) See supporting document listed in response to 2.a.3. above.
- 3) See generally supporting documents listed in response to 2.i. below.

- f) *Provide all information on electric equipment used at the facility, including transformers or other electrical equipment that may have contained polychlorinated biphenyls (PCBs).*

All electrical transformers on the premises are owned by Seattle City Light. Three of the four transformers are marked as containing non-PCB fluid. Dawn's environmental consultant, Advanced Environmental Management Group, has been in contact with Seattle City Light regarding the need for written confirmation that the fourth transformer also contains non-PCB fluid. To date, Dawn has received no reply to its request.

- g) *Provide information on the type(s) of oils or fluids used for lubrication of machinery or other industrial purposes, and any other chemicals or products which are or may contain hazardous substances which are or where used at the facility for facility operations.*

Attached is information on the type(s) of oils or fluids used for lubrication of machinery or other industrial purposes, and any other chemicals or products which are or may contain hazardous substances which are used (or have been used since 2004) at the Fox Avenue plant for facility operations. Dawn provides the following document in response to this request:

1) List of Shop, Lab, & Plant Chemicals.

- h) *Provide any site drainage descriptions, plans or maps that include information about storm drainage which includes, but is not limited to, above or below surface piping, ditches, catch basins, manholes, and treatment/detention or related structures including outfalls. If available, also include information about connections to sanitary sewer.*

Site sanitary flow

The water supply and sanitary sewerage services for the facility are provided by the City of Seattle. Wastewater from cleaning in the manufacturing area passes through a grease trap before being discharged to the sanitary sewer system. The

grease trap is pumped out on a periodic basis. Wastewater from lab operations, utensil cleaning, and domestic use does not pass through the grease trap.

Site stormwater flow

Based on the best information available, it is believed that stormwater discharges to a stormwater main that discharges to the Duwamish Waterway from an outfall located one parcel north of the facility. Stormwater may also discharge to a sanitary sewer line. The facility is looking to perform a camera test in order to verify where the stormwater discharges from the site.

The site topography gently slopes from east to west towards the Duwamish Waterway. The embankment at the waterline of the Duwamish Waterway is severe. Based on facility personnel observations, stormwater sheet flow moves generally from east to west towards the Duwamish River. Stormwater that collects in catch basins generally flows from west to east toward Fox Avenue South.

Secondary containment

The secondary containment area for the food and stove oil bulk storage tanks is equipped with a manually operated sump pump. As needed, trained facility personnel visually check stormwater that has collected in the secondary containment area to confirm that oil is not present. If oil is not present in the secondary containment area, the sump pump is manually activated to discharge the stormwater into a trench drain in the railcar unloading area. This trench drain flows to a sump that pumps liquid to the storm drain located southwest of the secondary containment area. From there, the liquid flows to a storm drain located southwest of the facility. If oil were present, a commercial waste-hauling services provider would remove the stormwater for disposal offsite.

- i) *With respect to past site activities, please provide copies of any stormwater or drainage studies, including data from sampling, conducted at these properties. Also provide copies of any Stormwater Pollution Prevention or Maintenance Plans or Spill Plans that may have been developed for different operations during the Respondent's occupation of the property.*

The following plans related to Dawn's operations are provided:

Definitions On this Airbill, "we," "our" and "us" refer to Federal Express Corporation, its employees, and agents. "You" and "your" refer to the sender, its employees, and agents.

Agreement To Terms By giving us your package to deliver, you agree to all the terms in our current Service Guide, which is available on request. You also agree to those terms on behalf of any third party with an interest in the package. If there is a conflict between the Service Guide and this Airbill, the Service Guide will control. No one is authorized to change the terms of our Agreement.

Responsibility For Packaging And Completing Airbill You are responsible for adequately packaging your goods and properly filling out this Airbill. If you omit the number of packages and/or weight per package, our billing will be based on our best estimate of the number of packages we received and/or an estimated "default" weight per package as determined by us.

Responsibility For Payment Even if you give us different payment instructions, you will always be primarily responsible for all delivery costs, as well as any cost we incur in either returning your package to you or warehousing it pending disposition.

Limitations On Our Liability And Liabilities Not Assumed

- Our liability for loss or damage to your package is limited to your actual damage or \$100, unless you declare a higher value, pay an additional charge, and document your actual loss in a timely manner. You may pay an additional charge for each additional \$100 of declared value. The declared value does not constitute, nor do we provide cargo liability insurance.
- In any event, we will not be liable for any damage, whether direct, incidental, special, or consequential in excess of the declared value of a shipment, whether or not Federal Express had knowledge that such damages might be incurred including but not limited to loss of income or profits.
- We won't be liable:
 - for your acts or omissions including but not limited to improper or insufficient packing, securing, marking, or addressing or those of the recipient or anyone else with an interest in the package

- if you or the recipient violate any of the terms of our Agreement
- for loss or damage to shipments of prohibited items
- for loss, damage, or delay caused by events we cannot control, including but not limited to acts of God, perils of the air, weather conditions, acts of public enemies, war, strikes, civil commotions, or acts of public authorities with actual or apparent authority.

Declared Value Limits

- The highest declared value allowed for FedEx Letter and FedEx Pak shipments is \$500.
- For other shipments, the highest declared value allowed is \$50,000 unless your package contains items of "extraordinary value," in which case the highest declared value allowed is \$500.
- Items of "extraordinary value" include shipments containing such items as artwork, jewelry, furs, precious metals, negotiable instruments, and other items listed in our Service Guide.
- You may send more than one package on this Airbill and fill in the total declared value for all packages, not to exceed the \$100, \$500 or \$50,000 per package limit described above. (Example: 5 packages can have a total declared value of up to \$250,000.) In that case, our liability is limited to the actual value of the package(s) lost or damaged, but may not exceed the maximum allowable declared value(s) or the total declared value, whichever is less. You are responsible for proving the actual loss or damage.

Filing A Claim YOU MUST MAKE ALL CLAIMS IN WRITING and notify us of your claim within strict time limits set out in the current Service Guide.

We'll consider your claim filed if you notify our Customer Service Department at 1-800-Go-FedEx® (800)463-3339 and make your claim in writing as soon as possible.

Within 90 days after you notify us of your claim, you must send us all the information you have about it. We aren't obligated to act on any claim until you have paid all transportation charges, and you may not deduct the amount of your claim from those charges.

If the recipient accepts your package without noting any damage on the delivery record, we will assume the package was delivered in good condition. For us to process your claim, you must make the original shipping cartons and packing available for inspection.
